CONFERENCE ROOM LAYOUT

CONFERENCE ROOM DIMENSIONS

FOR A MORE SUSTAINABLE FUTURE

Meetings, weddings and events in the hotel are treated in the same way as our other food service areas. We avoid single use plastics, use plated food (instead of buffet) where possible and ask for pre order if possible to reduce wastage. We mention our sustainability journey and Green tourism in our contracts with tour companies. Linen is used instead of paper cloths and napkins.

Food waste and recyclable waste are separated and disposed of accordingly. At a conference promotion day we are doing in June we are providing a bus for people coming from Belfast to reduce carbon footprint of individuals driving. Instead of providing pens and paper to every delegate we ask the conference organiser what is needed and place it in a separate table so less may be used. We ask organisers if they can email notes or use the screens provided instead of handouts.

We use fresh local produce from within 50 miles of the hotel where possible. This is communicated with the provenance cards and at pre event meetings. Vegan, allergy and gluten free alternatives are available on our conference menus. The post visit questionnaire asks for feedback on our sustainability practices. We have installed smart TV's and screens for sharing information to reduce paper use and where paper is needed we use 100% recycled. Both Java Republic coffee and Punjana teas commit to ethical trading and Java Republic are a carbon neutral company.

All the bathroom toiletries are pump bottles to reduce wastage and kind to environment White Company products. There are no longer hand towels but low energy air hand driers.
